

Friends of Botanic Gardens of Adelaide plant sale at the Mulberry Arbor, off Moreton ay Fig Tree Walk, Adelaide Botanic Garden on Sunday, 24th April from 10.30am to 2.30 pm. There may be only a few of some plants available and there may be others not listed here.

No.	Botanical Name	Common Name	Origin	Label Text
	<i>Acacia gillii</i>		S. Eyre Peninsula Australia	A slender, open shrub or small tree with smooth, grey-brown bark, pendulous branches with globulous golden-yellow flower heads at irregular times throughout the year. Open position in well-drained soil.
	<i>Adenanthos sericeus</i>	Albany woolly bush	Western Aust.	An upright evergreen shrub to about 3mH x 2mW with fine silvery leaves and small bird-attracting flowers. Most well-drained soils. Does well on front-line coast. May be trimmed to make it more dense and popular in pots for Christmas trees which can be brought inside in December.
	<i>Alyxia ruscifolia</i>		SA, NSW & Qld.	This species is a shrub to around 2mH but can get taller. Produces sweetly scented white flowers in spring and summer. Orange berries in autumn. Frost resistant but drought tender. Happy in alkaline or neutral soils and on coast. May be pruned to a neat hedge.
	<i>Araucaria bidwillii</i>	Bunya pine	Queensland, Australia	Tall evergreen conifer from the Jurassic period to 40mH x 10mW. Medium to heavy well-drained soil in a protected position whilst young. Bears large, heavy cones to 7kg with edible nuts. Timber valued by cabinet makers and for acoustic guitar soundboards. Frost resistant and drought tender. For large gardens or parks or as a container plant.
	<i>Baloghia lucida</i>	Brush Bloodwood	NSW, Qld	Evergreen tree to 15m x 2m with glossy green leaves and white flowers 2 cm across in spring. Prefers well-composted soil in a warm position. Drought and frost resistant once established. Its sap was used on Norfolk Island as an indelible dye for marking fibres and for staining the timber of Norfolk Island pine.
	<i>Buddleja davidii</i>	Butterfly bush	China	An evergreen small tree or large shrub to 5mH x 3mW with arching branches and fragrant scented pink flowers in long terminal spikes in summer. Adaptable to most soils and conditions and drought and frost resistant.
	<i>Brillantaisia ulugurica</i>			A long-flowering plant with striking purple flower spikes in summer. It needs some protection in winter. Full sun or part-shade in our climate and prune flower heads after flowering. Can reach 1.5-3m in height.
	<i>Buckinghamia celcissima</i>	Ivory Curl Tree	Queensland	Medium-sized evergreen tree to 7-8m in cultivation, with dark green foliage and spectacular racemes of cream flowers in summer to early winter. Suited to most well-drained soils and conditions but frost and drought tender.
	<i>Buxus microphylla var. japonica</i>	Japanese box	Japan & Taiwan	A compact evergreen shrub which can be used as a formal or informal hedge, barrier or screen. Can be pruned as a low border or left as background screen. Leaves turn bronze in winter.
	<i>Callistemon pachyphyllus</i>	Bottlebrush	Australia NSW	An evergreen shrub to 3m x 3m with deep crimson or green bottlebrush flowers to 10cm long in spring and summer. Prefers light to heavy soils with some summer water. Bird attracting.
	<i>Camptotheca</i>		China & Tibet	A medium sized deciduous tree which can reach 20m in height with the right conditions.

	<i>acuminata</i>			The new leaves are a bright red in colour. The bark and stems contain the alkaloid camptothecin, a compound being researched for cancer treatment.
	<i>Correa alba</i>	White Correa	Australia	A compact evergreen shrub to 1.5m x 1m but can be clipped to ball or smaller shrub. White tubular flowers from winter to spring. Prefers light to medium soil in sun or semi-shade. Occasional summer watering. Salt tolerant and frost resistant.
	<i>Deutzia glauca</i>			
	<i>Deutzia gracilis "Nikko"</i>	Japanese snowflower	Japan	A graceful, compact low-growing semi-deciduous shrub to 60cm. with racemes of small white flowers in late spring, early summer. Suited to most soils. Needs some summer water. Sun or part-shade. Frost resistant once established.
	<i>Daphne odora "Alba"</i>			A spreading evergreen shrub 1mH x 1mW with dark green, leathery leaves and attractive buds which open to reveal splendid, waxy pink or white flowers with a wonderful fragrance.
	<i>Diospyros scabrida</i>	Coastal Bladderwort or Vaswartbas	S. Africa	A quick-growing evergreen shrub to 2-3mH x 1.5-3mW with a compact habit and attractive glossy dark green foliage and white/cream scented flowers. Full sun to semi-shade. Any well-drained soil. Drought resistant and frost-hardy. Often used as a hedge. Grows well at Wittunga Botanic Garden.
	<i>Eremophila glabra "gold"</i>	Emu bush	Australia	A neat dense groundcover to 1m wide with tubular golden flowers most of year. Well drained clay or loam soils in an open, sunny position. Needs little water after establishment.
	<i>Eremophila maculata</i>		Australia	A hardy semi-prostrate form of <i>Eremophila</i> with attractive green foliage and reddish tubular flowers with spotted throats for most of the year. Suited to most soils in an open sunny position. Drought hardy and bird attracting.
	<i>Fuchsia microphylla</i>	Small-leaved fuchsia		Small evergreen shrub to 1.8m. Small red/pink flowers in autumn. Prefers well-drained fertile soil in dappled shade. Needs summer water. Frost-resistant when mature.
	<i>Forsythia intermedia</i>			A vigorous medium deciduous shrub with an amazing display of golden yellow flowers in spring. Moist alkaline, acid or neutral soils in an open sunny or part-shaded position.
	<i>Fuchsia coccinea</i>	Scarlet Fuchsia	Brazil	A fast-growing shrub that can vary in habit according to its habitat. In good conditions in shade it can grow up to 3.5mH, but is best pruned after flowering. It bears scarlet flowers, mainly in summer and requires fertile, well-drained neutral soil. Some shade in summer is useful but plenty of light is needed in winter. The fruit is edible. Frost and drought tender.
	<i>Gardenia sp.</i>			A wonderful perfumed shrub that produces pure white double flowers throughout the year. Does best with protection from sun, as well as the flowers. Sheltered position with neutral to acid soil. A great plant with a bushy habit for a pot.
	<i>Grevillea hilleana</i>	White silky oak	NSW & Qld	An evergreen tree with white flowers in cylindrical clusters. Prefers well-composted soil in a protected position. May be drought and frost tender.
	<i>Guichenotia ledifolia</i>		W. Australia	An evergreen shrub to 0.3mW x 0.8mH with loose heads of 5 petalled mauve flowers from winter to spring. Prefers light soils in an open sunny position. Frost resistant.

	<i>Hardenbergia violacea</i>	Purple Coral Pea	SE Australia	A vigorous evergreen twining vine with clusters of purple pea-shaped flowers in spring. Suited to most well-drained soils in an open, sunny position. Drought & frost resistant. Butterfly attracting.
	<i>Hebe hartii</i>	Veronica	NZ	A clump-forming hardy perennial 0.5-1mH with clusters of white flowers in late spring and early summer followed by conspicuous seed capsules. Suited to most well-drained soils.
	<i>Jasminum nudiflorum</i>	Winter jasmine	China	A hardy shrub to 2-3mH x 2-3mW. In winter the whole plant is covered in bright yellow flowers. Does best in full sun. Prune after flowering.
	<i>Jovellana violacea</i>		Chile	An upright mound-forming shrub 1.5-2m h x 0.5mW with clusters of lilac flowers in Spring/Summer. Full sun to part shade in well drained soil. Protect from heavy frost. Unusual plant, rare in cultivation. Ideal potted plant. May be grown in a pot in good light indoors.
	<i>Lonicera nitida</i>	Box leaf Honeysuckle		This evergreen shrub makes a magnificent clipped hedge, responds well to regular clipping and can also be used for creating topiaries. Best kept to about 1m in height. Does best in full sun. These plants may be clipped to small balls.
	<i>Laurus nobilis</i>	Sweet Bay	Greece	A small evergreen tree which may be pruned to a shrub. Adaptable to most soils. Open, sunny position. Frost resistant but drought tender. Purported to repel pantry moths.
	<i>Libertia chilensis</i>	Satin Flower		A clump-forming hardy perennial 0.5-1mH with clusters of white flowers in late spring and early summer followed by conspicuous seed capsules. Suited to most well-drained soils. Attractive in groups in perennial borders. Do not plant near bushland
	<i>Myoporum parvifolium</i>	Creeping Boobialla	Australia	A prostrate evergreen groundcover to 1mW with small white flowers in summer and autumn. Light to heavy well-drained soils in an open, sunny position. Occasional summer watering.
	<i>Myrtus communis</i>	Common myrtle	Mediterranean	An evergreen shrub which if not pruned can reach a height of 3-5m. Often clipped into a hedge, it produces masses of white flowers throughout the year, followed by purple berries. Leaves have a nice aroma when crushed. Frost resistant.
	<i>Olearia scillionensis</i>	Perrenial daisy		A evergreen shrub with small leaves and masses of white daisy flowers. Well-drained soil in an open position. Good in perennial borders.
	<i>Ozmanthos delavayi</i>		SW China	An evergreen shrub about 2mH x 2mW with white sweetly scented flowers and glossy green leaves. Purported to be adaptable to most soils. Frost resistant but drought tender.
	<i>Ozmanthos fragrans</i>	Sweet Osmanthos	Himalayas, China & Japan	An evergreen shrub about 2-4mH x 1-2mW with an exceptional strong perfume. The flowers can be used in tea to infuse the lovely aroma. It is relatively cold and drought hardy and responds well to regular pruning. The new growth is a lovely red colour.
	<i>Rhagodia candolleana</i>	Saltbush	Southern Australia	A small bush with reddish berries from coastal regions. Requires well-drained soil. Good habitat for birds, small mammals and Saltbush Blue Butterfly. Fire resistant.
	<i>Scaevola aemula</i>	Fairy Fan Flower	Australia	A mat-forming perennial groundcover with fan-shaped blue flowers in summer & autumn. Light to heavy soils in light shade or morning sun. Does better with an occasional watering in dry weather. Good as a groundcover between shrubs or edging plant
	<i>Teucrium fruticans</i>	Bush Germander	S. Europe	An evergreen shrub with silver-grey leaves to 1.2mH x 1.5mW with blue tubular flowers.

				Prefers a well-drained open position. Drought resistant but frost tender. Sometimes pruned to a low hedge.
	<i>Ternstroemia gymnanthera</i>		SE Asia	Evergreen tree to 5m x 2.5m w. with white flowers and clusters of red berries. Prefers cool. Light, well-drained acid soils in a warm position. Frost resistant but drought tender.
	<i>Ugni molinae</i>	Chilean guava	Chile	A medium-growing shrub 1-3mH x 1mW with white flowers that hang down, followed by delicious small fruit, purplish in colour. It is a great addition to the garden as a fruit tree or ornamental plant.
	<i>Tarcchananthos comphoratus</i>	Camphor bush	Africa	A semi-deciduous small tree or shrub from 2 to 9m high from dry, inland gardens in the north of Africa with pale grey narrow leaves., creamy-white terminal, scented, flowers. It has many medicinal uses. The leaves can also be used for massaging body stiffness and as a perfume. Drought and frost hardy and can shoot from the base after fire.
	<i>Westringia fruticosa</i> (Purple fl. form)	Coastal Rosemary	NSW & Queensland	A dense evergreen shrub from 1-2mH x up to 3m W with purple flowers in summer. Most well-drained soils in open sunny position. Often used as a hedge. Drought and frost resistant, but does better with occasional summer water.

Note: Whilst in nursery pots, plants need to be well-watered daily. Wean gradually after planting out.
