

Friends of Botanic Gardens of Adelaide plant sale at Mt. Lofty Botanic Garden on Sunday, 25th September 2022 from 10.30am to 2.30 pm in the Chris Steele Scott Pavilion south of the Lower Car Park off Lampert Road, Piccadilly. There may be only a few of some plants available and there may be others not listed here.

No.	Botanical Name	Common Name	Origin	Label Text
	<i>Acis autumnalis</i>			A tough and hardy short bulbous perennial to about 10-16 cmH with fine leaves and up to 4 white bell-shaped flowers on a long stem summer to autumn. Prefers a light soil and sheltered position in full sun to dappled shade., Will gradually multiply. Lift and separate bulbs when they become crowded. Protect new growth from slugs & snails. Gained RHS award. Suitable for pots or ideal for a "fairy garden"
	<i>Acronycha oblongifolia</i>		NSW & Qld	An evergreen tree to 14m with a spread of 4m in its natural habitat with small white flowers and white, yellowish or blue fruits. Prefers rich moist soils in a protected position or may be grown in a pot and taken indoors from time to time. Drought & frost tender.
	<i>Adenanthos sericeus</i>	Albany woolly bush	Western Aust.	An upright evergreen shrub to about 3mH x 2mW with fine silvery leaves and small bird-attracting flowers. Most well-drained soils. Does well on front-line coast. May be trimmed to make it more dense and popular in pots for Christmas trees which can be brought inside in December.
	<i>Alyxia ruscifolia</i>		SA, NSW & Qld.	This species is a shrub to around 2mH but can get taller. Produces sweetly scented white flowers in spring and summer. Orange berries in autumn. Frost resistant but drought tender. Happy in alkaline or neutral soils and on coast. May be pruned to a neat hedge.
	<i>Backhousia citriodora</i>	Lemon myrtle	Queensland	An evergreen tree which can grow to 15m in Queensland but can be pruned to a shrubs if desired or grown in a pot in a courtyard. Profuse clusters of white flowers in spring and summer. Requires medium to heavy soil in a well-drained, sunny but protected position. Leaves may be used for flavouring food and drinks.
	<i>Baloghia inophylla</i>	Brush Bloodwood	NSW, Qld	A rare evergreen tree to 15m x 2m with glossy green leaves and white flowers 2 cm across in spring. Prefers well-composted soil in a warm position. Drought and frost resistant once established. Its sap was used on Norfolk Island as an indelible dye for marking fibres and for staining the timber of Norfolk Island pine.
	<i>Buddleja davidii</i>	Butterfly bush	China	An evergreen small tree or large shrub to 5mH x 3mW with arching branches and fragrant scented pink flowers in long terminal spikes in summer. Adaptable to most soils and conditions and drought and frost resistant.
	<i>Buddleja myriantha</i>	Chinese butterfly bush	Burma, Tibet, W. China	A semi-deciduous shrub which grows along the forest edges at altitudes of 2,000 -3,200m with violet to purple flowers. Butterfly attracting.
	<i>Buckinghamia celcissima</i>	Ivory Curl Tree	Queensland	Medium-sized evergreen tree to 7-8m in cultivation, with dark green foliage and spectacular racemes of cream flowers in summer to early winter. Suited to most well-drained soils and conditions but frost and drought tender. May be seen in ABG north of the Bicentennial Conservatory.
	<i>Buxus microphylla var. japonica</i>	Japanese box	Japan & Taiwan	A compact evergreen shrub which can be used as a formal or informal hedge, barrier or screen. Can be pruned as a low border or left as background screen. Leaves turn bronze in winter.

	<i>Callistemon pachyphyllus</i>	Bottlebrush	Australia NSW	An evergreen shrub to 3m x 3m with deep crimson or green bottlebrush flowers to 10cm long in spring and summer. Prefers light to heavy soils with some summer water. Bird attracting.
	<i>Cornus sericea</i> "Flaviramea"	Yellow stemmed Dogwood	North America	A nice bushy habit and great autumn foliage that turns buttercup yellow once the leaves fall. The bright yellow stems are quite a sight. Prune hard every couple of years to keep the colour in the stems.
	<i>Deutzia gracilis</i> "Nikko"	Japanese snowflower	Japan	A graceful, compact low-growing semi-deciduous shrub to 60cm. with racemes of small white flowers in late spring, early summer. Suited to most soils. Needs some summer water. Sun or part-shade. Frost resistant once established.
	<i>Diospyros scabrida</i>	Coastal Bladderwort or Vaswartbas	S. Africa	A quick-growing evergreen shrub to 2-3mH x 1.5-3mW with a compact habit and attractive glossy dark green foliage and white/cream scented flowers. Full sun to semi-shade. Any well-drained soil. Drought resistant and frost-hardy. Often used as a hedge. Grows well at Wittunga Botanic Garden.
	<i>Dodonaea baueri</i>		Southern SA endemic	A prostrate shrub to 1mH x 2-3mW with small yellow flowers from December to March. A hardy, drought tolerant plant, best in full sun.
	<i>Euonymus alatus</i> "Compactus"			One of the best plants for autumn colour with bright red leaves in autumn. A smaller growing shrub to 1-3mH x 1-2mW. With a compact habit
	<i>Flindersia australis</i>	Australian teak	NSW & Qld.	Often used here as an indoor plant but needs to be refreshed outside from time to time. In garden it may grow to a height of 30m x 4mW. Semi-deciduous. Has large attractive pods segmented into 5 sections. Frost tender.
	<i>Fuchsia procumbens</i>	Trailing Fuchsia	New Zealand	A groundcover with tiny flowers followed by attractive red berries. Prefers rich, moist soil in a shady, sheltered position. Suited to a hanging basket.
	<i>Forsythia x intermedia</i>			A vigorous medium deciduous shrub with an amazing display of golden yellow flowers in spring. Moist alkaline, acid or neutral soils in an open sunny or part-shaded position.
	<i>Fuchsia coccinea</i>	Scarlet Fuchsia	Brazil	A fast-growing shrub that can vary in habit according to its habitat. In good conditions in shade it can grow up to 3.5mH, but is best pruned after flowering. It bears scarlet flowers, mainly in summer and requires fertile, well-drained neutral soil. Some shade in summer is useful but plenty of light is needed in winter. The fruit is edible. Frost and drought tender.
	<i>Guichenotia ledifolia</i>		W. Australia	An evergreen shrub to 0.3mW x 0,8mH with loose heads of 5 petalled mauve flowers from winter to spring. Prefers light soils in an open sunny position. Frost resistant.
	<i>Hebe hartii</i>	Veronica	NZ	A clump-forming hardy perennial 0.5-1mH with clusters of white flowers in late spring and early summer followed by conspicuous seed capsules. Suited to most well-drained soils.
	<i>Helleborous x orientalis</i>	Lenten rose	W. Asia	Low growing perennial plant with attractive greenish-purple flowers in spring. It prefers well-drained soil in a shady or morning sun position. Frost resistant but drought tender.
	<i>Jovellana violacea</i>			An upright mound-forming shrub 1.5-2m h x 0.5mW with clusters of pale lilac flowers in Spring/Summer. Full sun to part shade in well drained soil. Protect from frost. Unusual plant, rare in cultivation. Ideal potted plant. May be grown in a pot in good light indoors.

	<i>Myoporum parvifolium</i>	Creeping Boobialla	Australia	A prostrate evergreen groundcover to 1mW with small white flowers in summer & autumn. Light to heavy well-drained soils in an open, sunny position. Occasional summer watering.
	<i>Nepeta "Walker's blue"</i>	Catmint	Europe	A hardy groundcover with grey leaves and spikes of blue tubular flowers in spring and summer. Suited to most well-drained soils in an open, sunny position. Prune after flowering. Attractive to bees, butterflies and cats.
	<i>Olearia picridifolia</i>	Daisy	WA, SA & Vic.	A small spreading shrub to 50cmH with blue daisy-like flowers from July to November. Occurs in mallee & heath areas in south WA and south-east of SA. Open sunny position with occasional summer watering. Most light well-drained soils.
	<i>Olearia scillionensis</i>	Perennial daisy		A evergreen shrub with small leaves and masses of white daisy flowers. Well-drained soil in an open position. Good in perennial borders.
	<i>Ophiopogon japonicus</i>	Mondo Grass	China & Japan	A clumping evergreen perennial plant to 20cmH. It will grow in sun or shade and when mass planted will out-compete weeds. A very useful plant for borders or rock gardens.
	<i>Ophiopogon japonicus 'Nanus'</i>	Dwarf Mondo Grass	China & Japan	Dwarf Mondo grass will grow to only 10cm high.
	<i>Psychotria onicerioides</i>		Qld. & NT	A fairly open shrub to 4mH from north-east Queensland to NT, bearing small white flowers and edible creamy yellow fleshy fruit. Hardy in well-drained soil in most situations, Sun or part shade. Butterfly & bird attracting.
	<i>Scaevola aemula</i>	Fairy Fan Flower	Australia	A mat-forming perennial groundcover with fan-shaped blue flowers in summer & autumn. Light to heavy soils in light shade or morning sun. Does better with an occasional watering in dry weather. Good as a groundcover between shrubs or edging plant
	<i>Teucrium fruticans</i>	Bush Germander	S. Europe	An evergreen shrub with silver-grey leaves to 1.2mH x 1.5mW with blue tubular flowers. Prefers a well-drained open position. Drought resistant but frost tender. Sometimes pruned to a low hedge.
	<i>Rhododendron "Eliza Knight"</i>			
	<i>Ozmanthus fragrans</i>			
	<i>Murraya paniculata</i>			
	<i>Daphne odora (large)</i>			
	<i>Cardiocrinum gihganteum</i> – Rare			
	Clipped <i>Lonicera</i> balls			

Note: Whilst in nursery pots, plants need to be sheltered and well-watered daily. Wean gradually after planting out.
